CRSO Report- HAVA will no longer be using the DCRGC facilities for their training events. They thanked us for the use of our range and the continuing support of the program and the people that it helps.

The two new 5 yard shooting positions on the pistol range have proven to be quite useful and the club may be putting more 5 yard positions in on a later date. More info on that to follow.

The club has been trying out new lighter target frames. The new frames are more cost effective as they take less materials to make. The feedback from the shooters and membership has been very positive towards the new frames.

There are new signs on the public range on all of the shooting positions, reminding people to case and uncase their firearms on the shooting benches.
